CEO Message

It is a well-known fact that technology is an integral part of the lives of young people. Seeing young people tapping on their phones and mobile device has become a default backdrop in almost every metropolitan city in the world. Many of you may ask, 'our young people are already a tech-savvy bunch, why do they need to learn more?'

Having worked with many young people via Cyberport programmes and events, I thoroughly understand deep knowledge is the basis of all innovations. For Hong Kong to advance and continue to be a global innovation and technology hub, we need more innovators, not merely consumers and operators. Therefore, we need to inspire our next generation, equip them with digital tech knowledge and above all, real-life experience, so that they will know better how to apply their knowledge effectively. It is exactly this belief led to the beginning of our first digital tech internship programme in 2011.

With concerted effort from like-minded industry leaders around the world, trust from participants and support from the Cyberport community, we have been able to expand the Cyberport Digital Tech Internship Programme year-after-year in magnitude and depth. Positive feedback from students and employers through the years and having witnessed many young people flourished into digital tech innovators, encouraged us to grow this programme continuously.

In this brochure, we will share with you an overview of the journey of Cyberport Digital Tech Internship Programme since 2011 and details of each programme with genuine feedback from participants as well as employers. We sincerely invite you to be part of this journey and contribute to the sustainable development of the digital tech industry.

Talent galore

Interns come from tertiary institutions in Hong Kong and over 10% are postgraduates.

- The University of Hong Kong
- The Hong Kong University of Science and Technology
- The Chinese University of Hong Kong
- City University of Hong Kong
- The Hong Kong Polytechnic University

Silicon Valley

Cyberport has been building relationships with digital tech industry players in Silicon Valley for years. With a shared vision in nurturing the next generation of digital tech innovators, many global industry icons are great supporters of Cyberport Digital Tech Internship Programme. Not only have the participants benefited from the experience, the employers also enjoyed the fruitful experience from working with young people, who often bring in fresh ideas and incredible drive to success.

Cyberport provides:

- Roundtrip airfare
- Accommodation allowance
- Travel insurance
- Enrichment activities
- Visa application

Programme Details

Duration: 8 to 12 weeks (Summer)

Eligibility: All full-time students from universities in Hong Kong studying computer science, computer engineering or related disciplines

Job nature: Software or programme development-related positions

Openings: 5-10

Cyberport ↔ Plug and Play

Plug and Play is a global innovation platform. They invest in over 100 companies every year and have 22 locations across the world with success stories that include PayPal, Dropbox, SoundHound and Lending Club.

Intern Sharing

"People from technology companies in Silicon valley are energetic and helpful compared to those in Hong Kong. With abundant local resources and capital, it's the best place to begin a start-up project."

Tommy Chan

The Chinese University of Hong Kong
Plug and Play software engineering intern

Employer Feedback

"Tommy is an easy-going, detail-oriented team player and helped build prototypes for Android devices. We enjoyed working with him and wish he could've stayed longer!"

Cyberport ↔ 500 Startups

500 Startups is one of the top startup engines in the world and the mastermind behind funding 1,500 companies, spanning across 50 countries involving over 3,000 founders. Some of the famous companies supported by them include MakerBot, Wildfire, Viki, Simple, etc.

Intern Sharing

"This experience taught me not to be afraid of making mistakes and that trying new things isn't hard - you just have to go for it."

Sunday Ku

The Chinese University of Hong Kong
500 Startups software engineering intern

Employer Feedback

"Sunday Ku is a talented programmer with the skills needed to work at top software engineering companies. He is smart, hardworking, and willing to learn new things. If we had an opening for a software engineer, we would be interested in bringing him back."

Shanghai

The very first step Cyberport Digital Tech Internship Programme made was in Shanghai. Since its establishment in 2011, the number of participating companies never stopped growing adding to the diversity of opportunities available for students as well as employers who are looking for talents in different digital tech areas.

Cyberport provides:

- Roundtrip airfare
- Accommodation allowance/ arrangements
- Travel insurance
- Enrichment activities

Programme Details

Duration: 8 to 12 weeks (between June and August)

Eligibility: All full-time students from universities in Hong Kong studying computer science, computer engineering or related disciplines

Job nature: Digital technology-related positions

Openings: 25-30

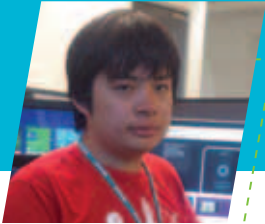

Cyberport ↔ Microsoft

Microsoft is the leading platform and productivity company for the mobile-first, cloud-first world. It is one of the biggest digital tech brand in the world and has a mission to empower every person and every organisation on the planet to achieve more.

For Ng Ting Fung, it was an extra rewarding experience as he was offered a chance to land a permanent position at Microsoft!

Intern Sharing

"It's my pleasure to be a Microsoft intern. Taking part in the Hackathon has been an unforgettable experience."

Ng Ting Fung

Microsoft Software Development
Engineer intern

Employer Feedback

"During his internship, Ng Ting Fung excelled at handling our cloud storage projects, including Azure sentimental analysis and Azure storage information wall. We greatly appreciate his efforts."

Azure Storage team, Microsoft

Cyberport ↔ EMC

EMC is a global leader in enabling businesses and service providers to transform their operations and deliver information technology as a service (ITaaS). With a strong arm in Shanghai, interns' experience has been entirely positively and contributing to their future careers.

Intern Sharing

"Thanks to my internship, I've acquired new knowledge about the information technology sector, which will help me plan my career."

Hung Tsz Chun

City University of Hong Kong
EMC intern

Intern Sharing

"My coworkers at EMC were very friendly. They offered advice and helped me improve my skills. In the end, the project was a success, and I'm very pleased."

Ip Wai Ki

The University of Hong Kong
EMC intern

Employer Feedback

"EMC's management greatly appreciated the intern group's efforts, and was very satisfied with their performance. At the Pi-Hack event hosted by the Office of the CTO, EMC, their demo video won the runner-up in the "Most creative use of a small computer device" category, which was phenomenal."

Grissom Wong

Principal Technologist of
EMC Lab China, CTO Office

Hong Kong

“e+startup” Internship Programme

Knowing many young people are attracted to the dynamic nature of start-ups without an in-depth understanding of its operation, Cyberport joins hands with the Cyberport Startup Alumni Association (CSAA) in launching a one-of-a-kind Internship Programme specifically at start-ups. Many participants in the past are either working at start-ups full-time or turned into one of the co-founders of start-ups!

Programme Details

- Duration: 8 to 12 weeks (between May and August)
- Eligibility: All full-time students from universities in Hong Kong studying information technology (IT), design, business or related disciplines
- Job nature: Programme design, network design, game and system development, marketing or related positions
- Openings: Depends on corporate demand

Cyberport ↔ Cyberport creative digital community

Employer Feedback

"It's wonderful to see the number of participants in the "e+startup" Internship Programme increasing every year, proving that the promotion strategy is highly effective."

May Ha
Marketing Director
Bull-B Limited

Employer Feedback

"Through the "e+startup" Internship Programme, we found two smart and capable students to help us with UX design and electronics engineering, furthering the company's development."

Tim Lui
Co-founder
Heartisans

During her internship, Stephanie was responsible for managing Penana's social media platforms, including Facebook, Twitter and Tumblr. She also attended networking events, pitching competitions and press conferences with Penana's founders.

Intern Sharing

"I really enjoyed my two-month stay at Penana. Working with the company's four founders was the happiest experience of my life."

Stephanie Chan
Penana Limited intern

During his internship, David pitched in a competition and won a prize, allowing him to join the Kairos Global Summit in Hollywood and learn about the ideas and experiences of successful professionals.

Intern Sharing

"The "e+startup" Internship Programme provided an exciting opportunity for us to be directly involved in operations and learn more about the world of startups in general."

David Yu
Apprendre Education Limited intern

Throughout the programme, Ricky attended conferences and events where inspiring individuals shared their stories, helping him realise the challenges of beginning a startup while encouraging him to pursue his dream of starting his own company.

Intern Sharing

"The "e+startup" Internship Programme allowed me to explore the startup world and experience what goes on behind the scenes."

Ricky Yeung
K.I.T. Network Limited intern

eHealth Record Internship Programme

Organised by Cyberport and funded by the Hospital Authority, the eHealth Record Internship Pilot Programme started in 2012. Interns are assigned to assist developing various applications for eHealth records - an initiative strongly advocated by the government. Cyberport provides participating corporations with assistance on recruitment, publicity, training sessions and arranging subsidy for the programme participants.

Programme Details

Duration: 12 months

Eligibility: Local tertiary education graduates from health informatics, information technology (IT)-related disciplines or healthcare (holding a UGC funded degree or an advanced diploma)

Job nature: Programme application design and system development related positions

Openings: 10-15

Fuzhou (This programme concluded in 2015)

Cyberport launched the Fuzhou NetDragon Technology Internship Programme in 2015 in cooperation with Fuzhou's NetDragon Websoft Inc., providing an opportunity for Hong Kong university students to experience China's online gaming, e-learning and mobile internet markets.

Cyberport ↔ NetDragon Websoft Inc. (HKSE: 0777)

NetDragon Websoft Inc. (NetDragon) is a leading innovator and creative force in China's online gaming and mobile internet industries, a pioneer in national online education and corporation informatisation and a key software development corporation in China's strategic planning.

Internship Scope

Worked directly with mentors, interns contributed to revolutionary e-learning products and participated in new product development, including software and hardware. Interns were rotated to various departments to gain knowledge in design, development, quality assurance and maintenance. Interns not only learned about leading trends and the infrastructure of internet service in Mainland China, but also the chance to develop projects with the local teams in Fuzhou.

Intern Sharing

"The programme was very rewarding and helped me improve my project management skills. There are no management-related courses in my major, so it was a great opportunity to learn how to oversee a project. At NetDragon, I've met successful people who've opened my eyes with their experiences and insights."

Sunny Lau

The Chinese University of Hong Kong
Technical trainee

Employer Feedback

"We are happy to have Hong Kong students working with us. NetDragon has always valued creativity and innovation, and we give all interns valuable experience. Learning is a way of life for us and we take the initiative to discover new things and expand our knowledge. I believe students had a great time here."

Lucas Liu

CEO of NetDragon Websoft Inc.

Programme Details

Duration: 6 weeks (between July and August)

Eligibility: All full-time students from universities in Hong Kong studying computer science, computer engineering or related disciplines

Openings: 4

Intern Footprint

Most of the alumni of Cyberport Digital Tech Internship Programme started building a career in the tech industry or running their own start-ups. They continue to participate in Cyberport events and programmes to upgrade their knowledge and skills as they pursue their tech dreams. Some well-known corporations like Google, Microsoft and Facebook, turned into their tech career launching pads.

Tony Kwok			Sunday Ku		
	Cyberport Digital Tech Internship Programme 2015 - Silicon Valley	A tech career at Morgan Stanley		Cyberport Digital Tech Internship Programme 2015 - Silicon Valley	A tech career at Stepcase (a tech start-up)

Friendships and bonding last beyond the programme

Cyberport understands, as much as the internship opportunities are valuable, friendships that grew along these experiences and the network that is built unknowingly are equally priceless. Cyberport takes an active role in nurturing the bonding among them by organising events especially for these alumni and assist them in sustaining the relationship with the tech industry.

Alumni of Cyberport Digital Tech Internship Programme get:

- subsidy in joining a wide range of tech associations.
- ample networking opportunities and events to deepen their tech knowledge.
- advice on developing a career in the tech industry.
- a lot of fun and new friendships!

Stay close, stay in touch!

Don't miss out this opportunity to broaden your network with like-minded tech innovators.
